

# Classification

## Environment Protection Act 1970

### Act No. 8056/1970

#### INDUSTRIAL WASTE MANAGEMENT POLICY (PRESCRIBED INDUSTRIAL WASTE)

#### Prescribed Industrial Waste - Classification by Hazard

Pursuant to clause 11(1) of the *Industrial waste management policy (Prescribed Industrial Waste)* and in accordance with the criteria presented in Schedule 1 to that policy, the Environment Protection Authority Victoria ("EPA") hereby classifies the prescribed industrial wastes specified in Section 3 below based on the hazard posed by the waste to human health and the environment.

#### 1 CLASSIFICATION NUMBER

2009/027

#### 2 OCCUPIER AND PREMISES TO WHICH THIS CLASSIFICATION APPLIES

- Veolia Environmental Services Pty Ltd ("the occupier")
- Registered Office: Level 1, Buckhurst St, South Melbourne, Vic 3205
- Premises: 15 Mc Donald Road, Brooklyn Vic 3012 ("the premises")

#### 3 PRESCRIBED INDUSTRIAL WASTE TO WHICH THIS CLASSIFICATION APPLIES

- 3.1 This classification applies to 6 tonnes of contaminated soil extracted from 30 Beverley St Yarraville and managed at the premises as specified in application:
- o containing lead with:
    - total concentrations not exceeding the TC2 thresholds specified in Table 2: Soil Hazard Categorisation Thresholds of booklet 6.2, *Soil Hazard Categorisation and Management* in EPA's *Industrial Waste Resource Guidelines 2009*; and
    - leachable concentrations not exceeding the ASLP2 thresholds specified in Table 2 of booklet 6.2 (above);
  - o containing any other contaminants where contaminant total concentrations do not exceed any TC2 thresholds and leachable concentrations do not exceed any ASLP2 thresholds specified in Table 2 of booklet 6.2 (above); and
  - o that does not display any of the specific hazard characteristics listed in Table 1: Specific hazard characteristics of booklet 6.3 (above).

#### 4 PERIOD OF VALIDITY

This classification commences on 25 Sept 2009 and is effective until 24 Oct 2009 unless it is revoked or varied by the EPA before that date.

## **5 HAZARD CLASSIFICATION**

EPA classifies the immobilised contaminated soil as Category B prescribed industrial waste that has been managed in accordance with the conditions set out in section 6 below.

## **6 CONDITIONS OF CLASSIFICATION**

The immobilised contaminated soil referred to in section 5 above (“wastes”) is only classified as Category B prescribed industrial waste if all of the following conditions have been met.

- 6.1 Waste assessment, treatment, storage, transport and disposal requirements must be in accordance with the relevant *Environment Protection (Industrial Waste Resource) Regulations 2009*; the EPA’s *Industrial Waste Resource Guidelines, 2009* and all applicable EPA publications (as amended from time to time).
- 6.2 Wastes must be managed in accordance with the methodology specified in the application.
- 6.3 Wastes must be sampled and analysed as per schedule 1 of this classification.
- 6.4 Wastes with results of laboratory analyses must be within the thresholds set by EPA before disposal to the landfill.
- 6.5 The occupier must comply with the reporting requirements in schedule 2 of this classification.
- 6.6 The occupier must keep a copy of laboratory analyses reports of wastes and waste transport certificate/s for a period of at least two years.
- 6.7 Wastes may be disposed to a landfill licensed by EPA to accept Category B prescribed industrial waste.

## **7 NOTE**

Wastes that have been managed in accordance with the conditions of this classification may only be disposed of using the following waste type code:

N120 – Category B contaminated soil (immobilised)

This classification may be amended or revoked by the EPA by way of written notice. Current classifications can also be found on EPA's website at [www.epa.vic.gov.au](http://www.epa.vic.gov.au)
