

# Fire prevention

Publication 1966 June 2021

## How to reduce the risk of fire

### Safe hot works

Always grind, cut and weld metals away from combustible materials. Make sure fire extinguishers and hoses are available.

### Remove ignition sources

Remove batteries, gas cylinders and other ignition sources, such as combustible materials, from stockpiles

### Manage your stockpiles

Limit fire spread between stockpiles, buildings and fuel loads. Always allow access between and around stockpiles for firefighting.

### Dedicated smoking areas

Dedicated smoking areas - Smoke cigarettes in designated smoking areas only. Dispose of cigarette butts in designated cigarette butt bins.

### Fire emergency response

Call 000 and follow your emergency management plan.
