

Do you work underground?

Working in a man hole or services pit?

Working in an underground excavation?

Working with stormwater or sewer pipes?

If you **smell** petrol or diesel
or **see** discoloured soils,
petrol or diesel

**An underground fuel tank
may be leaking**

**Report it to EPA Victoria
1300 372 842
1300 EPA VIC**

Leaking underground fuel tanks can pose a range of risks to human health and the environment.

Exposure to fuels can have health effects for those working underground.

Soil and groundwater contamination can lead to contamination of creeks and rivers.

Leaking fuel tanks can also pose a risk of fire and explosion.

If in doubt, it's better to report any pollution so EPA Victoria can investigate.
