

# Waste code transition to Environment Protection Regulations 2021

## Publication 1967.2\* June 2021

\*Replaces publication 1967.1

Some waste codes and waste descriptions are changing on 1 July 2021. New waste codes are defined under the Environment Protection Regulations 2021 (Regulations 2021).

From 1 July 2021, some waste types will be reclassified and represented under new waste codes. Other waste codes will be split into specific waste types. For example, A100 is being transitioned to A100, A110 and A130.

Waste codes defined under the Environment Protection (Industrial Waste Resource) Regulations 2009 (Regulations 2009) remain in force until 1 July 2021. Waste codes in force until 1 July 2021 can be found in Waste codes (publication IWRG822) ([epa.vic.gov.au/about-epa/publications/iwrg822-3](http://epa.vic.gov.au/about-epa/publications/iwrg822-3)).

EPA has transitioned waste codes from Regulations 2009 to Regulations 2021 as outlined in the tables below. New waste codes are aligned to waste duties (<https://www.epa.vic.gov.au/for-business/new-laws-and-your-business/manage-waste>) under Regulations 2021.

Landfill and compost waste codes apply administratively only – they do not appear in the Regulations 2021. They signify all wastes that are accepted on site.

**Table 1: Transition of prescribed industrial waste (PIW) codes**

Waste code until 1 July 2021	Waste code description	Waste code from 1 July 2021	Waste code description	Waste duty
<b>A100</b>	Cyanide-containing wastes	<b>A100</b>	Cyanide-containing waste resulting from surface treatment of metals and plastics	Reportable priority waste
		<b>A110</b>	Waste from heat treatment and tempering operations containing cyanides	Reportable priority waste
		<b>A130</b>	Cyanides (inorganic)	Reportable priority waste
<b>B100</b>	Acids in a solid form or acidic solutions with pH value of 4 or Less	<b>B100</b>	Acids in a solid form or acidic solutions with pH value 4 or less	Reportable priority waste
<b>C100</b>	Alkaline solids or alkaline solutions with pH value of 9 or more,	<b>C100</b>	Alkaline solids or alkaline solutions with pH value of 10 or more, including caustic soda,	Reportable priority waste

EPA acknowledges Aboriginal people as the first peoples and Traditional custodians of the land and water on which we live, work and depend. We pay respect to Aboriginal Elders, past and present.

As Victoria's environmental regulator, we pay respect to how Country has been protected and cared for by Aboriginal people over many tens of thousands of years.

We acknowledge the unique spiritual and cultural significance of land, water and all that is in the environment to Traditional Owners, and recognise their continuing connection to, and aspirations for Country.
