Owner engages auditor to provide 53V audit

If EPA requires audit through licence or notice, EPA must approve audit scope

Relevant assessment data given to auditor to assess risk from contamination or polluting activity

Auditor reviews data and provides opinion on risk posed, writes audit report

Auditor submits report to EPA

EPA checks and publishes audit report on website

If pollution remains, EPA may require auditor-verified cleanup plan to be prepared and implemented by site occupier

Site owner may use consultant to collect data

Auditor notifies EPA of engagement
