

EPA West Gate Tunnel Project Sensor Air Monitoring Long-Term Trends

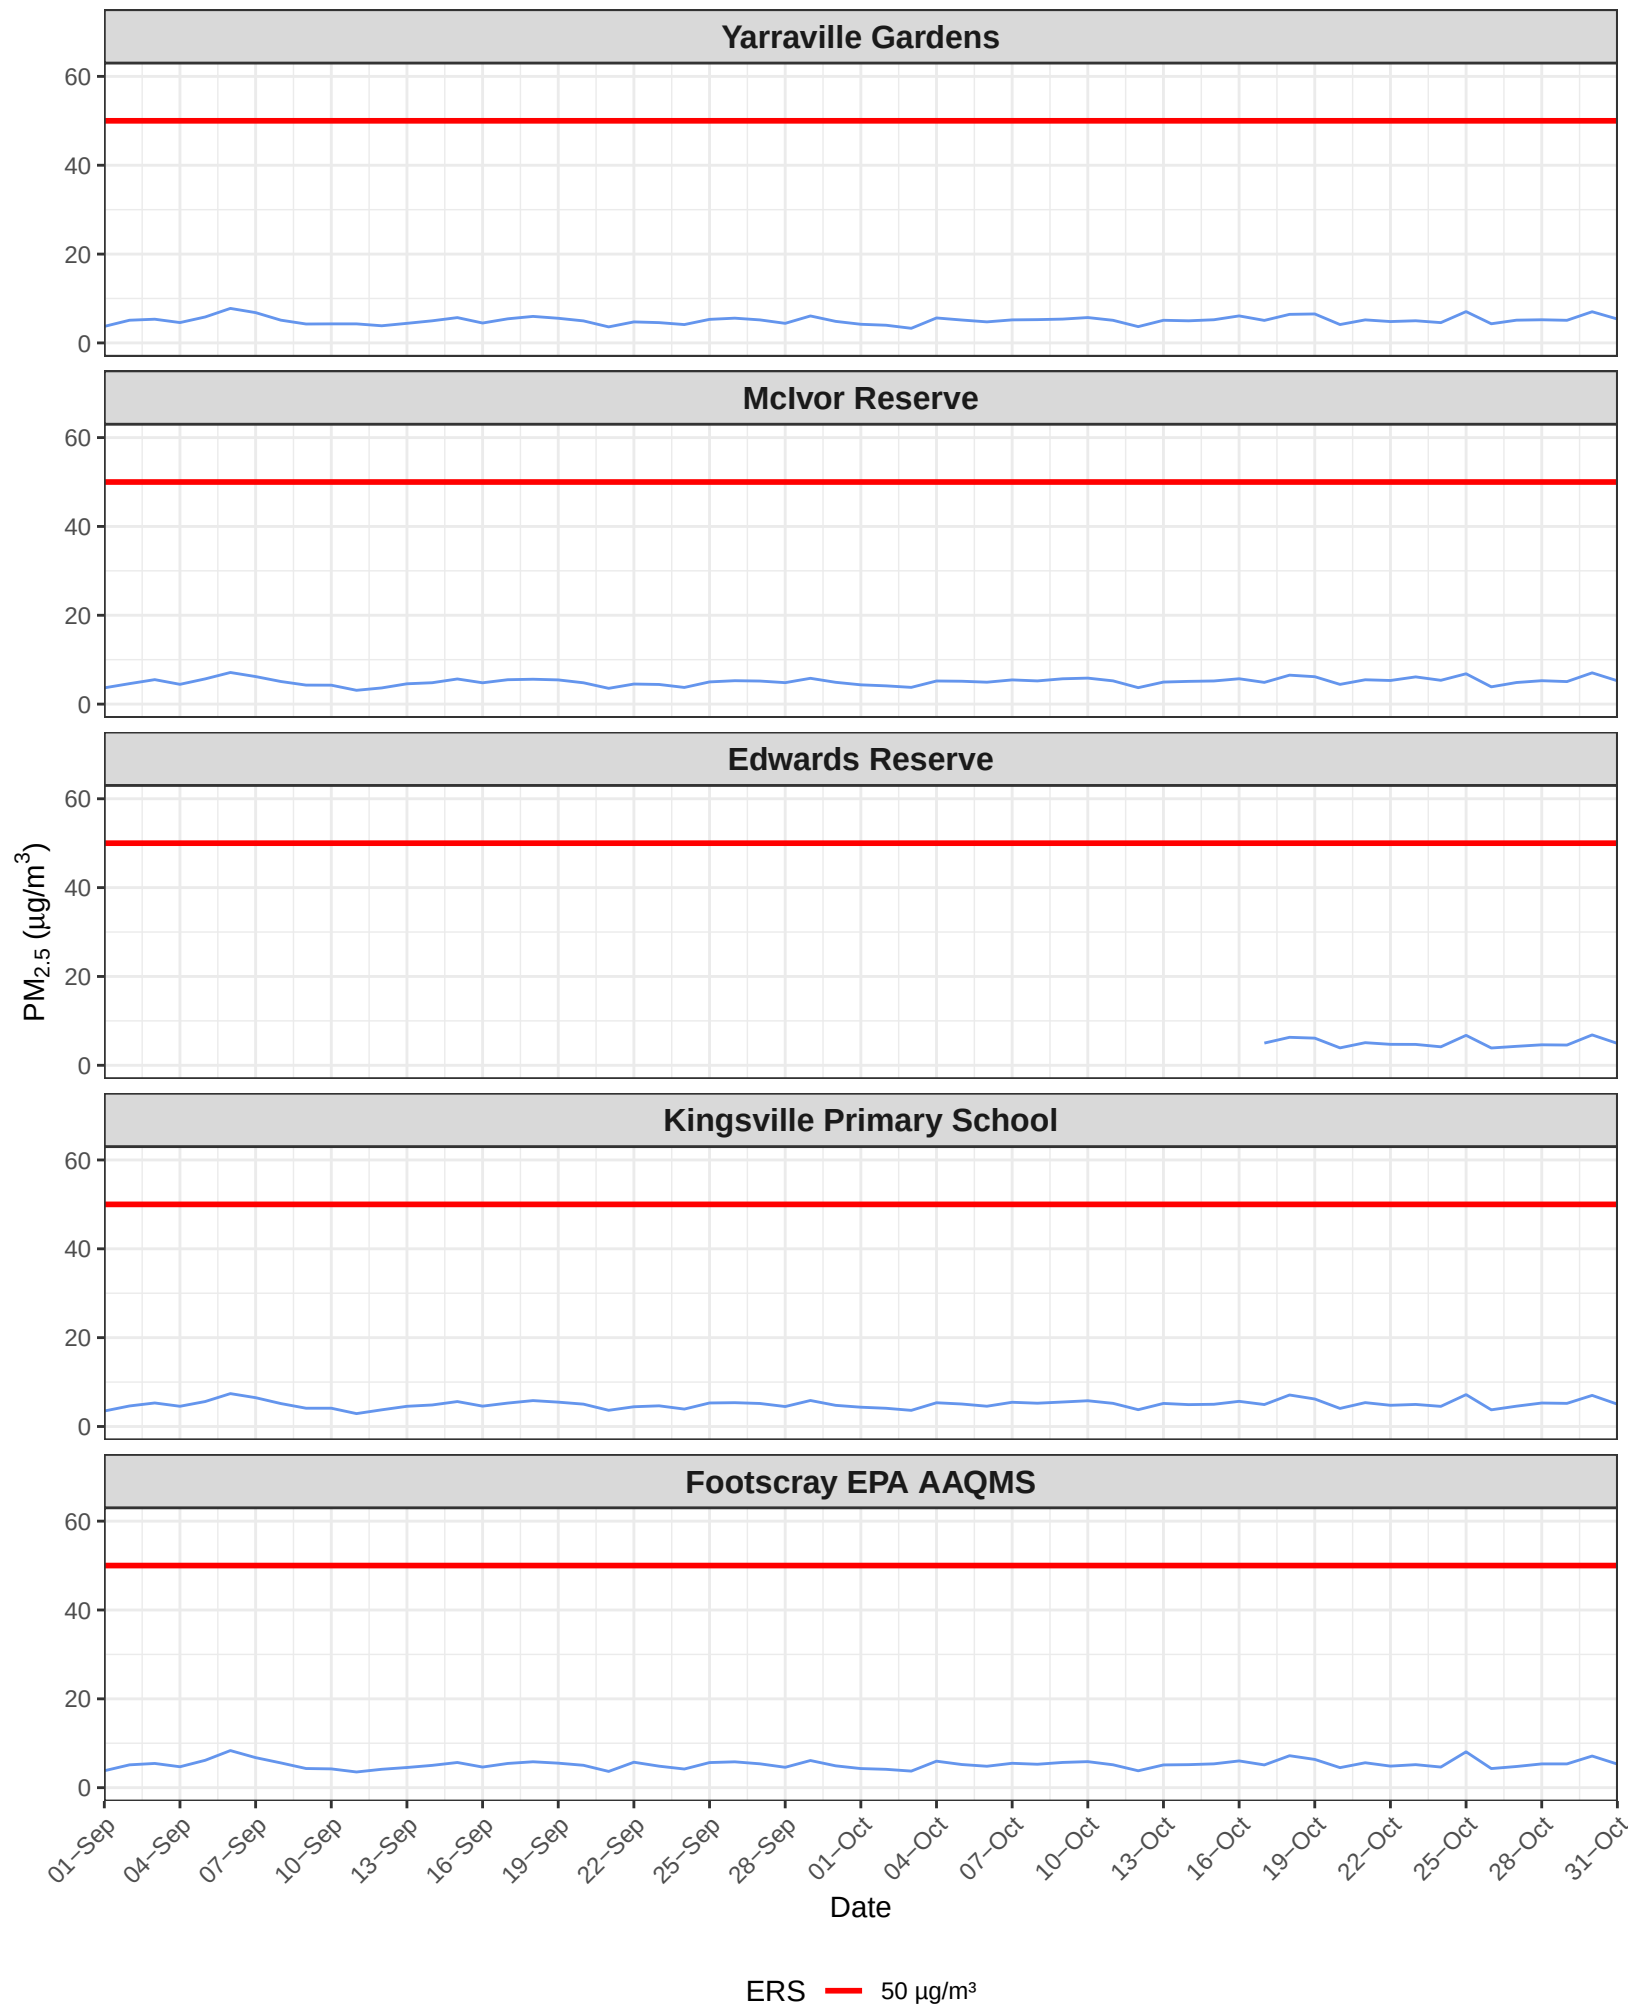

PM_{2.5} and NO₂ air monitoring sensor levels compared to the Environmental Reference Standard (ERS) are shown in the graphs below.

Edwards Reserve, Mclvor Reserve and Yarraville Gardens sites are near the West Gate Tunnel ventilation stacks.

The Footscray EPA Ambient Air Quality Station (AAQS) and Kingsville Primary School are local background sites.

This report summarises all monthly monitoring reports to establish long-term trends.

24-hr Average PM_{2.5} (µg/m³)

Hourly NO₂ (ppb)
